

SharePointLMS

Learning Management System
for Microsoft SharePoint Server®

www.sharepointlms.com

SharePointLMS

- a sophisticated Learning Management System

SharePointLMS

is a Learning Management System based on Microsoft MOSS SharePoint Server 2007® and WSS 3.0.

SharePointLMS

is an advanced tool for doing e-learning for both students and teachers.

It is a sophisticated E-Learning tool which offers a wide range of new functions and features to provide students and teachers a professional educational experience integrated in a well known Windows interface.

SharePointLMS

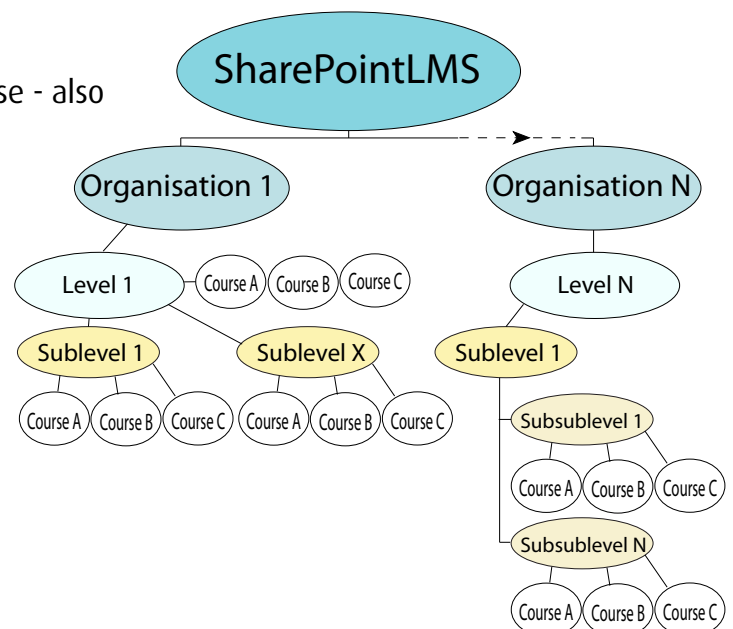

has a familiar web-based interface that allows you to:

- Easily integrate with the Microsoft Office® system
- Use Active Directory for user management
- Post and edit documents
- Check in/out documents
- Track documents and progress
- is quick, easy and efficient to use - also for non-technicians!

SharePointLMS

combines features from advanced E-Learning systems, adds new unique functions and integrates all this into an E-Learning tool providing:

- Multi Organisation Levels including individual branding of all Levels
- Interactive delivery
- Course catalogues
- Loads of assessments and tests
- Online course creation
- Group/mentor rooms with file sharing
- Tracking/reports on progress and skills attainment
- Collaborative tools: chat, threaded discussions, web conference tool incl. webcam, white board, session recording using MS Office Communication Server 2007
- Multiple Learning Paths
- Integrated Ephorus plagiarism control
- Integrated Podcasting Kit Server
- and even more...

SPLMS is probably the only LMS that can be deployed cross multiple organisations with many sub organisations and yet maintain the identity of each of these levels within the organisation. This unique feature allows you to deliver courses from the Top of your LMS all the way down to the lowest level.

SharePointLMS
